ABZ 101/102

2"-12" Resilient Seated Butterfly Valves Datasheet

2"-12" Resilient Seated Butterfly Valves ABZ 101/102

Fig. 101
Wafer style body

Fig. 102
Full lug style body

Standard Construction Specifications

Body

Cast Iron, Ductile Iron (Lug) and Aluminum (Wafer)

Disc/Stem

316 Stainless Steel, Aluminum Bronze, Ductile Iron, Epoxy Coated Ductile Iron

Stem

316 Stainless Steel, 416 Stainless Steel, Carbon Steel

Resilient Seat

EPDM, Buna-N, Viton, Natural Rubber, White Buna, White Neoprene

Stem Bushing

Teflon® – Graphite Impregnated

Stem Packing

Buna-N and Viton

Additional materials are available for a wide selection of applications.

Features and Benefits

1. Body machined to high tolerances. Guaranteed standard dimensions for interchangeability of parts and actuators.
2. Top bushings protect the stem from side thrust of operators. They are made of impact and corrosion resistant materials.
3. Special double-V-shape of stem seal self-adjusts to protect the stem area for either vacuum or pressure use.
4. Stem extends through disc and aligns with socket in body. Stem end has standard dimensions for operator interchangeability.
5. Long neck allows for insulation requirements.
6. The special snap-in Resil-O-Seat™ design fixes seat in place without bonding. The Resil-O-Seat is 100% field replaceable – no special tools required.
7. Stem and body are isolated from the line media by the interference fit of the primary seal created between the disc and seat.
8. Stainless steel cap screws securely hold disc to stem. O-ring seal prevents leakage into the stem area and creates a positive connection.
9. Resil-O-Seat forms a seal against all standard ANSI 125/150 flanges. Gasketing requirements are eliminated.
10. Disc edge is individually processed through machining and hand buffing for a smooth edge, providing a bubble tight shutoff and maximum seat life.

Sized for stainless disc, does not cover encapsulated disc trims.

Cv is defined as the volume of water in U.S.G.P.M. that will flow through a given restriction or valve opening with a pressure drop of one (1) p.s.i. at room temperature. Recommended control angles are between 20°–75° open.

2"-12" Resilient Seated Butterfly Valves ABZ 101/102

Notes

1. Dimension "K" not applicable to 12" size. The 12" stem is round with 1/4" Key.
2. The figures 101, 102 and 108 cannot be used on pipe or flange with an inside diameter less than the "E" dimension.
3. Valves are rated up to 175 PSI bi-directional service and 85 PSI end of line rating. Undercut disc is rated up to 50 PSI bi-directional service and 25 PSI end of line rating. Preferred direction is with disc bolts on downstream side of disc.
4. Designed in accordance with sections of API 609 Category A, ASME 16.1/16.5, ASME 16.34 and MSS SP67. Design tested in accordance with API 598.
5. Compatible with ANSI Class 125/150 flange standards.

About ASC Engineered Solutions

ASC Engineered Solutions is defined by quality—in its products, services and support. With more than 1,400 employees, the company's portfolio of precision-engineered piping support, valves and connections provides products to more than 4,000 customers across industries, such as mechanical, industrial, fire protection, oil and gas, and commercial and residential construction. Its portfolio of leading brands includes ABZ Valve®, AFCON®, Anvil®, Anvil EPS, Anvil Services, Basic-PSA, Beck®, Catawissa, Cooplet®, FlexHead®, FPPI®, Gruvlok®, J.B. Smith, Merit®, North Alabama Pipe, Quadrant®, SCI®, Sharpe®, SlideLOK®, SPF® and SprinkFLEX®. With headquarters in Commerce, CA, and Exeter, NH, ASC also has ISO 9001:2015 certified production facilities in PA, TN, IL, TX, AL, LA, KS, and RI.
